

Managed Data Services

Empower Decision Making

Quick access to the data you need,
where, when and how you need it.

DATA TO COLLABORATE ACROSS YOUR ENTIRE BUSINESS ECOSYSTEM

RFA's Managed Data Service's end-to-end data solution Provides configurable self-service reports and intuitive data visualizations. We help firms meet increasing demands for data consistency, transparency, and accuracy, while avoiding the high costs and potential risks associated with a firm gathering, cleansing and distributing such data on their own.

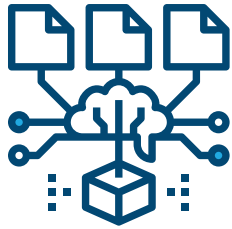

EMPOWER DECISION MAKING, SPUR REVENUE GROWTH, BE FASTER AND AGILE.

The elasticity to scale up and down quickly becomes your competitive advantage with RFA's Managed Data Service. Now your firm can manage the volume of data and kept up to speed with both data integration and distribution. Leverage the expertise and bandwidth of an experienced managed services provider to expand capacity and capability across any platform.

Capability	Benefits
Data consolidated into a common data platform with improved global transparency	Common data framework provides agility to meet future regulations and business expansion with greater control and visibility
Outsourcing software, hardware, and infrastructure support eliminates technology maintenance and upgrades	Receive regular maintenance and software upgrades
Automated enforcement of business rules, coupled with entitlement controls	Creates global financial data standards enterprise wide which facilitates data oversight, quality of regulatory reporting, and reduces risk
Connect to new data sources quickly and easily with the ability to support new lines of business and asset	Secure, auditable, and controlled access to data globally
Institutional-strength infrastructure and governance	Meet and satisfy due diligence requirements of regulators, clients, and investors

Improve Your Investment Operations

Now you can collect, aggregate, normalize and cleanse data; identify and remediate exceptions; and get ready-to-use data to your systems for you.

Data Warehouse

Unlimited compute, scale without limits.
